Randomness in Physics and Mathematics

From Integrable Probability to Disordered Systems

01 - 13 August 2022

ZiF - Center for Interdisciplinary Research, Bielefeld University

This international Summer School is building on three previous ZiF Summer Schools, bringing together international PhD students and young postdocs from various areas in mathematics, mathematical and theoretical physics. The participants will take part in 2 intense weeks of 8 interdisciplinary lecture series. These will be presented by 8 distinguished scientists. The school will include exercise sessions lead by the lecturers and offers the opportunity for all participants to present their own work in short contributions. The topics will include the theory of stochastic processes, complex networks, tilings, and integrable spin chains, using advanced mathematical and physics inspired tools as random matrices, partitions, replicas, and Coulomb gases. The three previous events at ZiF in [2013](#), [2016](#) and [2019](#) were rather successful.

Speakers:

Jean-Philippe Bouchaud (Paris, FRA)

Paul Bourgade (New York, USA)

Tom Claeys (Louvain, BEL)

Ioana Dumitriu (San Diego, USA)
Makoto Katori (Tokio, JPN)
Mylène Maïda (Lille, FRA)
