Highlights

- Dr. Petr Dementyev granted with Liebig-Stipendium

- "Wie schnell expandiert das Weltall?" Prof. Dominik Schwarz schreibt in Spektrum der Wissenschaft (German)

- Physicist Mark Schüttpelz receives Tycho-Jæger Prize

- Gender Professorship at Faculty of Physics and BINAS since SS2018
• Largest molecular spin found close to a quantum phase transition

• DFG Research Unit 2692 *Fundamental Aspects of Statistical Mechanics and the Emergence of Thermodynamics in Non-Equilibrium Systems* funded
• **Healthy aging: New EU project on the human liver**

• **Spin current from heat: new material increases efficiency**

• **Dancing electrons loose the race**

• **Collaborative Research Center TransRegio of the Theoretical High Energy Physics Group in collaboration with University Frankfurt and TU Darmstadt funded**
• **Healthy aging: New EU project on the human liver - Bielefeld University to coordinate programme with partners from nine countries.**

![Liver Image](image1)

• **Chip-based nanoscopy: Microscopy in HD quality - New invention at Bielefeld University and the University of Tromsø (Norway)**

![Chip-based Nanoscopy](image2)

• **Optical tractor beam traps bacteria-Physicists from Bielefeld University report on new methods in ‘Nature Communications’**

![Optical Tractor Beam](image3)
• Physicists find new explanation for key experiment - Researchers at Bielefeld University publish findings on spin caloritronics and are the first to apply measurement methods in the field

• Hot electrons point the way to perfect light absorption - Physicists study how to achieve perfect absorption of light with the help of rough ultrathin films

• Filtering pollutants with nanomembranes - Bielefeld University participating in two European research networks

• Cooling with molecules - Researchers at the universities in Bielefeld, Manchester, and Zaragoza present low-temperature experiment in Nature Communications
